

ESTMEE – European Student Teachers doing Mathematics Education in the Environment

The aim of the ESTMEE project is to work in an international setting to develop mathematical outdoor tasks to create math trails for 10 to 16 year old students. At the end the math trails will be tested and evaluated in a realistic educational context.

ESTMEE, a joint international project with eight partners:

- University Diderot Paris, France
- Goethe-University Frankfurt, Germany
- Jagiellonian University Krakow, Poland
- University of Bielefeld, Germany
- Stenden University in Meppel, The Netherlands
- Halmstad University, Sweden
- Stockholm University, Sweden
- University College Trondheim, Norway

The two-week Intensive Programme takes place

- during the period 2013-04-01 – 2012-04-13
- at the Goethe-University Frankfurt, Germany

The project offers

- refund of 90% of travel costs (up to a certain limit)
- accommodation at Frankfurt Youth Hostel (<http://www.jugendherberge-frankfurt.de>)
- breakfast every day 2013-04-02 – 2013-04-13
- dinner every day 2013-04-01 – 2013-04-12
- Social events, excursion
- 3 ECTS credits if you pass the examination

The applicant should

- speak English well enough to engage in discussions about mathematics education
- study teacher education with focus on mathematics
- preferably be at least a second year student of teacher education
- be interested in mathematics and teaching
- be interested in international and multicultural experiences

The application should include a one page personal presentation, including

- educational background
- reasons for wanting to participate in ESTMEE
- self-evaluation of English proficiency (written and oral)
- e-mail address
